

## Refreshing.

AFTER SIX years of the same hazard signs on the wall, change might be a good idea...nobody sees them anymore. **WindowGrid™** gives lab managers the means to continually update the messages, as often as needed. Sign clutter goes away. You'll get more of what you want, attention to the message, less clutter and confusion. It's ideal for using with training programs. Accessories take **WindowGrid™** well beyond an ordinary sign unit. It's an interactive focal point for all types of information in complex environments.

**WG.22** Multiple Size Graphics

**WG.21** Double Clear Option, Mounted on Window, Front & Rear Views

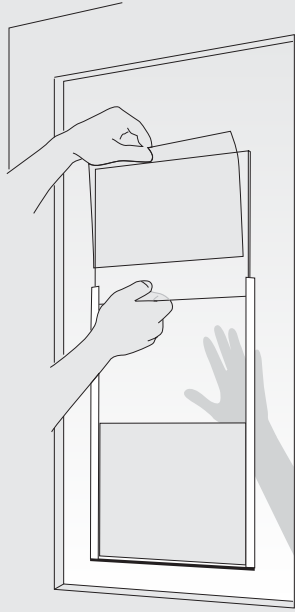

Lab Signs™

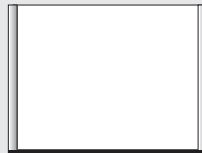

# WindowGrid

## Double Clear Option for Interior Windows

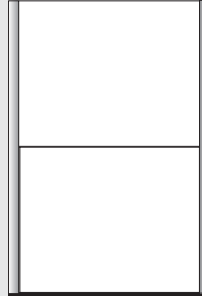

## Standard Configurations

WG -20

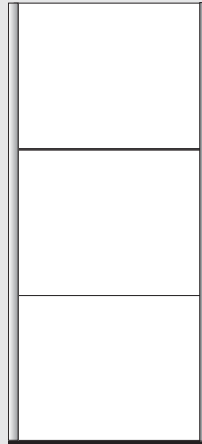

WG -10

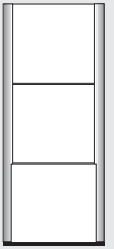

WG -21

WG -11

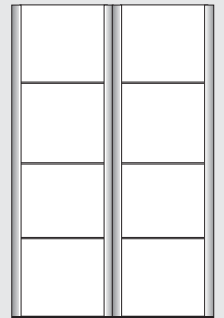

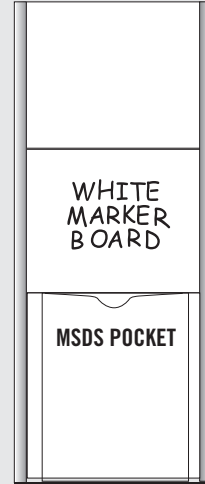

WG -22

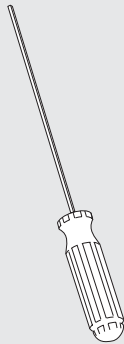

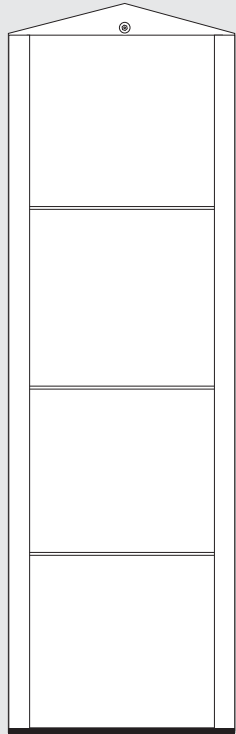

WG -12

### OPTIONAL INSERTS

WG -13 Tandem

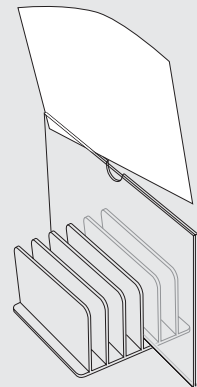

## Grid Lock Security Option

Security screw prevents unauthorized access to windows. Special tool is included.

## Using a Letter Holder to Load Multiple Windows

Purchasing extra windows allows you to manage a rotating message program, pre-loading the graphics in a central location. This is ideal for enhancing existing training programs.

### WINDOWGRID SPECIFICATIONS

All graphics are produced by end user unless otherwise specified. Call your Graphics Lab representative if you would like graphics included.

### SIZES & STYLES:

- Several stand configurations available.
- Highly modular and easily customizable.

### MATERIALS & COLORS

- Window: Standard or non-glare acrylic.
- Frame: Anodized aluminum, many available colors and textures. Please inquire. Paint, lacquer finish, to match PMS color.

### OPTIONS

- Clear back panel allows mounting on interior windows for double exposure of graphics.
- Order extra windows to permit ease of changing graphics at a remote location.
- Grid Lock feature secures windows in place to prevent unauthorized access to graphics. Tool provided.
